

ABSTRACT

DOMESTIC COMPOST MACHINE

ABSTRACT

- Organic waste and food waste is a worldwide problem, it is being disposed and nothing is gained from it.
- Food waste is found due to over population growth rate, industrialization, urbanization and economic growth. Still food wastage is an alarming issue in India.
- According to UN development programme up to 40% of food produced in India is wasted.
- Food waste that ends up in Landfills produces a large amount of methane- a powerful greenhouse gas.
- Composting has proven to be a valid solution to this problem but not entirely explored.
